

# FUNCTIONAL MEDICINE

## Melissa Herbranson MD, Family Medicine

The first visit will include a comprehensive history using the Functional Medicine Matrix and Timeline models by the Institute for Functional Medicine. Subsequent visits are based on these findings, results from lab work and response to treatment.

Treatment: In order to heal the body and mind from the root cause of illness and imbalance, I incorporate food plans, exercise plans, detoxification plans and nutraceuticals. This wholistic model strives to cure chronic disease instead of only treating the symptoms.
